Project Management and Professional Skills Program

Description

Successful planning of a project involves a carefully crafted set of steps leading to planned and measurable goals. In today's fast-paced business environment, this is no simple task. As deadlines get tighter and budgets get smaller, organizations turn to their managers to do more with less. Therefore, successful managers need to replenish their supply of practical skills, insightful strategies, and cutting edge concepts in order to remain a valuable asset to their company.

If you wish to create growth opportunities for yourself and want to become respected in the field of project management, take advantage of this Project Management and Professional Skills Program. Completed in just 12 days, this program will give you the skills necessary to tackle your project management challenges

Duration: 12 Days

Prerequisites:

- Basic familiarity with using a computer, such as browsing the Internet.
- Familiarity to navigate through the Microsoft Windows user interface.
